

Mobilize Your SharePoint

Challenge

SharePoint has become a lot more than just data storage spectacle; it has become an important productivity enabler. Nearly 80% of enterprises use Microsoft's SharePoint to store, manage and act upon corporate information. Enterprises need critical business information on-the-go, and are expecting mobile devices to be able to connect to their business data on SharePoint. Executives need actionable information that can be retrieved from their enterprise's SharePoint - based portals; whether they're in the office, their home office, or on-the-go.

WinWire Solution

infoBoard is a mobile application conceptualized to display personalized data from SharePoint portals. This mobile collaboration application allows seamless integration to your SharePoint data, and also provides the ease of retrieving documents, blogs, alerts, notifications and charts on-the-go. infoBoard is especially meant for 'on-the-move' executives, who require universal access to enterprise information and their personalized data on the finger-tip.

infoBoard

Access your SharePoint on a mobile device with rich UI/UX

infoBoard Plus

Access and Manage your SharePoint on a mobile device with rich UI/UX

infoBoard Enterprise

Manage multiple backend systems integrated through SharePoint on a mobile device
